Examples of foods shown to cure food poisoning are made only of McDougall recommended ingredients. See our website www.drmcdougall.com for free recipes and detailed instructions (no gimmicks).
The following translations have been performed voluntarily by readers of the McDougall Newsletter. The sole intention is to share this important message of food poisoning worldwide in order to relieve unnecessary suffering. Please point out to us (office@drmcdougall.com) any major errors in translation so that we can make corrections. Minor differences in wording and sentence structure will be overlooked as long as the basic message is correct.

Please distribute widely to friends and family by copying, reprinting, and sending in any form (Facebook pages, e-mail, newsletters, paper print, etc.). However, for profit use of this material is not allowed.

(Dr. McDougall’s Color Picture Book, “Food Poisoning,” is under copyright protection in order to avoid unintended reproductions.)
Moderation does not work for changing life-destroying habits. A cigarette smoker never quits by cutting down. Alcoholics do not sober up by switching to beer or wine. You must treat food poisoning with the same good or evil, right or wrong, go or stop, green or red attitude as you would treat drug addiction.

Forget about being reasonable, sensible, prudent, or moderate. You Can’t!

You Must Fix the Food

Just Say “NO”

To foods that are poisoning you and your family.
We Have Truth and Success on Our Side*

*Big Food: The Meat, Dairy, Egg, Fish, and Processed Food Industries have all the money. But we will beat them in the end.

www.drmcdougall.com
The truth is simple and easy to understand:

The McDougall Diet is based on starches with vegetables and fruits.

The McDougall Diet does not contain any animal foods or vegetable oils.

The McDougall Diet may contain some salt, sugar, and/or spice.
Starches are plant parts that store large amounts of energy for daily activities. They are very low in fat with no cholesterol. They are rich in protein, vitamins, and minerals. Starches are essential to satisfy your appetite and they make you trim, strong, and healthy. Eat starch!
Non-Starchy Vegetables

These plant parts provide interest, color, flavor, and some important nutrition (vitamins A and C). They are insufficient in calories to provide for daily energy needs. They should be side dishes only.

You must eat a starch-based diet!
Fruits are mostly simple sugar with some vitamins and minerals. They provide a flavorful (sweet) addition to meals. However, appetite satisfaction is minimal. Generally, 1 to 4 fruits daily is a good goal. **You must eat a starch-based diet!**
Not Food!

All animal products are full of cholesterol, animal protein and fat; with no starch, dietary fiber, or other essential sugars for health. They are infiltrated with big doses of people-poisoning environmental chemicals and loads of infection-causing bacteria, parasites, and viruses.
People Are Sick from Eating Like Kings & Queens

Historical writings and pictures tell how wealthy people who ate meat, poultry, fish, cheese, milk, etc. became fat and sick.

The difference is that now billions of people, because of “progress” (the industrial revolution and the harnessing of fossil fuels), eat like the aristocrats of the past.

What else would you expect from eating all these rich foods? Served at Burger King & Dairy Queen (McDonalds, Taco Bell, KFC, all restaurants, groceries, etc.)
“Food Poisoning” Causes:

Obesity

(plus complications: hypertension, diabetes, heart disease, cancer, etc.)
“Food Poisoning” Causes:

Diabetes
(type-1 & type-2 plus complications: eye damage, kidney failure, gangrene, etc.)
“Food Poisoning” Causes:

Heart Disease
(heart attacks, strokes, impotence, etc.)
“Food Poisoning” Causes:

Text Box 13-1

Arthritis
(rheumatoid, psoriatic, lupus, etc.)

Text Box 13-2
“Food Poisoning” Causes:

Text Box 14-1

Cancer
(colon, breast, prostate, uterus, etc.)

Text Box 14-2
“Food Poisoning” Causes:

GERD

(indigestion, esophagitis, ulcers, gallbladder disease, etc.)
“Food Poisoning” Causes:

 CONSTIPATION
(diverticular disease, hemorrhoids, fissures, hiatal hernia, varicose veins, etc.)
A Surefire Cure

Your body is always trying to heal itself.

Simply stop the food poisoning and the diseases quickly improve and/or go away.

Again: Food poisoning is primarily caused by eating animal foods and vegetable oils.
Benefits Happen Quickly

Within 24 hours expect relief of constipation, indigestion, GERD, oily skin, fatigue, etc. to begin.

Within 7 days expect:
3.5 pound (1.5 Kg) weight loss.
   (if starting overweight)
22 mg/dl (0.6 IU) reduction in total cholesterol.
8/4 mmHg reduction in blood pressure.
   (and BP medications are often stopped)
Arthritis is greatly improved.

In most cases medications for hypertension, type-2 diabetes, indigestion, etc. can be stopped
(Under doctors’ supervision, of course).

Within 4 months most chronic problems from food poisoning are a matter of history.

This is a cost-free, side-effect-free treatment.
One of the Earliest Controlled “Scientific” Trials of the McDougall Diet

A Bible story 2600 years ago: Daniel and his men, eating vegetables, were compared to men eating animal foods (like most Americans do now). At the end of the ten days the vegetarians looked healthier and better nourished than any of the young men who ate the royal food.
Gladiators Were the “Barley Men”

Strength and endurance come from eating starches. Think about the warriors of the past and the long distance runners of today: They are powered by starches. Winners never eat much meat, poultry, dairy, etc.
Do Not Eat

(cows, pigs, lambs, deer, buffalos, whales, etc.)
Do Not Eat

Poultry
(chickens, turkeys, ducks, etc.)
Do Not Eat

Fish
(salmon, tuna, trout, perch, etc.)
Do Not Eat

Shellfish
(lobster, shrimp, crabs, etc.)
Eggs
(chicken, goose, duck, ostrich, etc.)
Do Not Eat

Milk
(cow, goat, sheep, camel, etc.)
Do Not Eat

Cheese
(cow, goat, sheep, camel, etc.)
Butter or Margarine
(even Earthbalance, Smartbalance, etc.)

Do Not Eat
Fake Meats and Cheeses

(hot dogs, sausages, burgers, lunch meats, cheeses, ice creams, etc.) Most are made from isolated-proteins from soybeans combined with other chemicals. Also avoid those made from proteins of wheat, pea, fungi, etc.)
Vegetable Oils
(corn, flaxseed, olive, safflower, etc.)
Remember: “The fat (oil) you eat is the fat you wear.”
False Advertising in order to Sell Dangerous Foods

The meat industries say you must eat their products for protein…

The dairy industries say their products are necessary for calcium…

“Omega-3 fats” and fish comes to mind, immediately…

The truth is that protein and calcium deficiencies have never been reported on any natural diet sufficient in calories…

and only plants can make omega-3 fats. No fish or other animal can make them.
Eat Starches:

Text Box 32-1

All large populations throughout history ate primarily starch: corn, rice, potatoes, etc.

Text Box 32-2

Caloric Engines of Human Civilization

Text Box 32-3

Corn (maize)
North, Central, South America for 7,000 years

Potatoes
South America (Andes) for 13,000 years

Legumes
- Americas, Australia and Europe for 6,000 years

Sweet Potatoes
South America and Caribbean for 5,000 years

Millet
- Africa for 6,000 years

Sorghum
- East Africa for 6,000 years

Barley
- Middle East for 11,000 years

Oats
- Middle East for 11,000 years

Wheat
- Near East for 13,000 years

Rice
- Asia for more than 10,000 years

Rye
- Asia for more than 5,000 years
Cold Cereal
(wheat, rice, corn, millet, etc.)
Use fruit juice, or a little rice or soy milk, etc. to moisten.
You can eat this meal for breakfast, lunch, and/or dinner.
Eat Lots Of

Pancakes
(whole wheat, buckwheat, potato, etc.)
No oil, dairy or eggs.
Hash Brown Potatoes

*Oil-free.* “Fry” in a non-stick pan or electric griddle. Top with salsa, ketchup, other sauces, etc.
Bean Soups
(Minestrone, white bean, pea, lentil, etc.)
Cook in slow cooker or pot.
Buy already prepared in boxes and cans.
Lentil, Potato, Carrot Soups

(Use your favorite legumes, grains, and vegetables, etc.)

No animal products or added vegetable oils.
Vegetable Soups
(tomato, onion, corn, carrot, barley, etc.)

Make a big pot and eat all week long with breads, baked potatoes, and other convenient starches.
Eat Lots Of

Potatoes (boiled, baked, steamed, etc.)

Never fried with oil or fat!
Mashed Potatoes

(Idaho, russet, Yukon gold, etc.)

Eat for breakfast, lunch and/or dinner. Potatoes provide complete nutrition: protein, amino acids, calcium, iron, fiber, vitamin C, etc.
Sweet Potatoes (baked, mashed, boiled, etc.)
You can successfully live on a diet of sweet potatoes alone until you find other meals to eat.
Breads

(whole grain wheat, rye, etc.)

Bread is known as “the staff of life” for good reasons. *Do not use butter, etc.*
Eat Lots Of

Pastas
(wheat, buckwheat, brown rice, etc.)
Think of this as “Comfort Food.”
No olive oil or meat added.
Lasagna
(whole wheat, vegetables, tomato sauce, etc.)
Make with your favorite “no oil” sauces and spices. No cheese or meat.
Eat Lots Of

Pizza
(whole wheat, vegetables, tomato sauce, etc.)
Make with your favorite “no oil” sauces and spices. No cheese or meat.
Brown Rice
(and all other whole grains)
Even white rice is better for you than animal foods and vegetable oils.
Rice & Vegetable Dishes

Sometimes all you can find is white rice and other refined grain products. Of course, whole grain is better.
Vegetable Sushi

White rice and white noodles are far better for you than animal foods and vegetable oils. Look at billions of trim, fit Asians.
Beans, Rice, and Corn

Eat simple meals of starches then add some green vegetables and fruits for vitamins A and C.
Grain-based Salads
(bulgur, barley, millet, couscous, quinoa, farro, maize, rice etc.)
These are traditional Middle Eastern foods.
No vegetable oils, of course.
Whole Grain and Bean Patty Burgers

(Not soy burgers)

Garnish with lettuce, tomato, mustard, ketchup, pickle relish, etc.
Eat Lots Of

Whole Grain Bread and Vegetable (Bean) Spread Sandwiches
(No fake soy-based-meats and cheeses)
Fruits

Eat a few – like 1 to 4 a day. They are mostly simple sugars which offer only short-time appetite satisfaction – you will be left hungry. These add interest to a starch-based meal plan but will not sustain you. Starch will satisfy!
Non-Starchy Vegetables

Eat a few daily. If you eat a diet of green, yellow, red, and orange non-starchy vegetables you will be hungry all the time. These foods do add interest and some concentrated nutrients to a starch-based meal plan but they will not sustain you.
Tofu and Other Natural Soy

They are fat-filled. Tofu, miso, soy milk, etc. are fine as a condiment. Not as the main course.

*Remember – No fake meats and cheeses.*
Nuts and Seeds

They are fat-filled. They will keep you overweight and obese.
You may become a “Fat Vegan.”

Helpful for those in need of gaining weight.
Avocados

They are fat-filled. 90% of calories are from “good” but fattening fat. 
Helpful for those in need of gaining weight.
Dried Fruits
High simple sugar calories.
Minimal appetite satisfaction.
Helpful to gain weight
and for endurance athletes.
Juices

They are high in simple sugar calories. The quality of a food is not improved by beating it a thousand times with a steel blade. Also true with blending vegetables into juices.
Salt, Sugar & Spice

Most people can use these flavors. If in doubt then check with your professional healthcare advisors.
Vitamins, minerals, and other plant nutrients are essential for health, but you must get them in their natural packages. Isolated concentrated nutrients found in pills increase your risk of death, heart disease, and cancer.

The only exception is vitamin B12.
The risk of a B12 deficiency disease is extremely small (1 in a million) and takes more than 3 years to develop.

To avoid even small risks, take this supplement. The need is fewer than 5 micrograms (mcg) daily.

However, the smallest doses sold in stores are 500 mcg. Likely, no side effects occur from the excess. Once a week is adequate.
Some Light Exercise
(walking, swimming, bicycling, etc.)
*Don’t hurt yourself with strenuous activities.*

Some Sunshine is Essential
(vitamin D and other benefits)
*But not too much.*
If not to save yourself and your family, how about saving planet Earth?

The livestock industries are producing over half of the global warming gasses.

The meat, poultry, egg, dairy, and fish industries are major unregulated polluters of the environment.

Fortunately, we can stop this overnight. Say “No” to food poisoning!

Instead, eat beans, bread, corn, pasta, potatoes, sweet potatoes, rice, etc.
See a professional, trained, healthcare provider familiar with the effects of diet on health when changing your foods and/or medications.
